

Objective:

To manage users and groups using Azure Entra ID.

Services Used:

- Azure Entra ID Step No 1

The screenshot shows the Microsoft Azure portal's 'Default Directory | Overview' page. The left sidebar has 'Overview' selected. The main area displays basic directory information:

Name	Default Directory	Users	1
Tenant ID	d50a7e74-fa72-4964-949e-82b0702368fb	Groups	0
Primary domain	bsse2280152szabist.onmicrosoft.com	Applications	0
License	Microsoft Entra ID Free	Devices	0

Step no 2

The screenshot shows the 'Create new user' page in the Microsoft Azure portal. The 'Identity' section contains the following fields:

- User principal name *: labuser1
- Mail nickname *: labuser1
- Display name *: Lab User
- Password *: Lusu551349
- Account enabled:

At the bottom, there are buttons for 'Review + create' and 'Next: Properties >'. A 'Give feedback' link is also present.

Step 03

The screenshot shows the 'New Group' page in the Azure portal. At the top, there's a breadcrumb navigation: Home > Default Directory | Overview > New Group. The main form has the following fields:

- Group name ***: LabGroup
- Group description**: labuser1
- Membership type**: Assigned

Below the form, there are sections for Owners and Members, both currently showing "No owners selected" and "No members selected". At the bottom right of the form area is a blue "Create" button.

Step no 4

The screenshot shows the "User Administrator | Assignments" page in the Azure portal. The URL in the address bar is: Home > Default Directory | Roles and administrators > Roles and administrators | All roles > User Administrator. The left sidebar shows navigation options: Diagnose and solve problems, Manage, and Assignments (which is selected). The main content area includes a search bar with "labuser1" typed in and a dropdown menu set to "User". A message at the top says, "You can also assign built-in roles to groups now. Learn More". Below the search bar is a table with columns: Name, UserName, Type, and Scope. No data is visible in the table.

Result:

Successfully managed identities using Azure Entra ID.
